Premier

THE BIGGER THE LURE,
the BIGGER THE BREAKFAST.

Decisions made at the beginning of the day are your building blocks, partner. Try and construct a day of serious musky fishing on a croissant and you're heading nowhere. Not even a Premier® casting rod can make up for that level of ill-preparation. Oh sure, they're built from premium SC^{II} graphite with ultra-hard SiC tip tops, making these a fine choice for the most rabid musky hunters as well as the hungriest of bass wackos. And yes, they're lighter and faster and stronger — not to mention prettier with that gloss black pearl blank. But a croissant? Nice try.
