

THANK GOODNESS FOR ICE FISHING OR ALL OF US UP HERE AT ST. CROIX WOULD BE REDUCED TO JOINING A *bowling league* TO PASS THE WINTER MONTHS.

GREG "THE PROWLER" WILCZYNSKI

Not that bowling isn't excellent recreation – but we'd rather be outside fishing with our Legend® ice rods. Who can blame us? Their patented super finesse and adjustable spring bobber makes them about the finest rod ever to stand guard over a hole. Likewise, our Premier® ice fishing rods and combos are a rock solid (like the ice, hopefully) way to get started in ice fishing or build up a genuine arsenal. Yes sir, bowling can wait. Like forever.

St. Croix's Legend ice rods feature a patented built-in strike indicator system developed by Greg "the prowler" Wilczynski. This unique spring bobber system turns ordinary fishermen into fish catching machines. A medalist in world ice fishing competitions, Greg spent years refining his invention. Look for Greg's seminars throughout the north country.

IRC34 – ICE ROD/REEL CASE

Designed to hold multiple rods with reels attached, carrying your gear out onto the ice is now a piece of cake. Full-length zipper makes the in and out easy. And the shoulder strap ingeniously keeps them out of your way to and from the shanty.

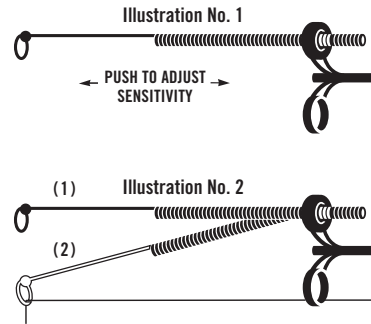

LEGEND ICE RODS

Ice Rod Strike Indicator System – How it Works:

St. Croix's strike indicator system is adjustable, so its sensitivity level can accommodate different lure sizes. To make the bobber more sensitive, push the spring forward through the grommet. To make it less sensitive, push it back. (illustration no. 1)

The system is most sensitive when there is a 30-degree bend (position 2) in the spring. To find the bottom, lower the jig until the indicator returns to position 1. Then, either slowly reel up once or lift the rod slightly until the indicator is back to position 2. (illustration no. 2)

Features

Super-finesse, high-tension, stainless-steel strike indicator with 24-carat gold plating.

Fully adjustable and interchangeable spring indicator system.

Solid carbon blank for extreme sensitivity and durability.

Comfortable, secure-lock reel seat.

Premium, lightweight stainless-steel guides.
